Local Business Models Mitigation in Response to COVID-19 Outbreak

In response to an outbreak, a local business is modeling mitigation in response to COVID-19. Club 301 is working closely with the Kittitas County Incident Management Team (IMT) to keep customers safe, employees working, and everyone vaccinated.

Club 301 is currently mitigating an outbreak and anyone who was at the 301 from April 23 to May 1 should be tested and isolate until test results are returned. To mitigate the outbreak, 301 is completing the following:

- On May 17 from 3 to 6pm, there will be a vaccine clinic at the 301 (301 N Pearl Street) to get the COVID-19 vaccine. The clinic will offer Moderna and J&J. There is no cost or appointment necessary.
- Only fully vaccinated employees will be working at 301 in the coming days.
- The establishment has voluntarily dropped the percent of customers allowed inside during this time.
- All employees will be quarantined and tested.

“We would rather work with businesses to stay open instead of shutting them down, to include getting employees vaccinated,” states Incident Commander Darren Higashiyama. “We are thankful to use this as an opportunity to get more people vaccinated in Kittitas County.”

For questions about the upcoming clinic at Club 301, please contact the 301 directly at 509-925-3001. To find additional vaccine appointments or to read about the COVID-19 vaccine, please visit the Washington State Department of Health’s website at www.doh.wa.gov. If you have questions about COVID-19 testing, please contact your healthcare provider or the KVH COVID clinic at 509-933-8850. If you have questions about your health, please contact your healthcare provider. If you are having a medical emergency, call 911 or go to the Emergency Department at KVH.
